

Quality Turf & Ornamental Products

Quinclorac 75 DF

Post-Emergent Herbicide

Dependable post-emergent control of both broadleaf and grassy weeds in a wide variety of turf species from residential and commercial to golf courses, sports fields and sod farms.

- Long-lasting control of weeds and grasses - from one month up to 90 days
- Excellent control of crabgrass, even in its mature stages
- Eliminates a broad spectrum of broadleaf and grassy weeds without harming turf
- Application and seeding flexibility - ideal for seeding and overseeding before or after application

Formulation	75% a.i. dry flowable
Active Ingredient	Quinclorac
Competitive Brand	BASF Drive®
Packaging	6 x 1 lb (30 cases/pallet)
Application Rates	See label for specific uses and rates
Mode of Action	Absorbed by roots and foliage, active ingredient translocates to interfere with plant growth and cellulose production, which quickly causes plants to die
Signal Word	Caution
